Journal of Non-Crystalline Solids 95&96 (1987) vii–xv
North-Holland, Amsterdam

CONTENTS

Preface vii
List of Committees ix
List of Invited Speakers x
Contents Part I and II xi

PART I

Section 1: Invited Papers

The ubiquitous glass transition
Cooper, A. 1

Experimental characterization of amorphous structures in metals and ceramics by pulsed neutron scattering
Suzuki, K. 15

The structure of dense-packed metallic and oxide glasses
Eckersley, M.C. and P.H. Gaskell 31

NMR studies of the structures of glasses
Bray, P.J. 45

ESR study on glass
Gan Fuxi and Liu Huimin 61

Physical properties of phase separated glasses
Mazurin, O.V. 71

Computer study of glass transition
Yonezawa, F., S. Nosé and S. Sakamoto 83

Optical properties of fluoride glasses
Takahashi, S. 95

Recent progress in superionic conducting glasses
Minami, T. 107

Electrochemical behavior of glass melts
Takahashi, K. and Y. Miura 119

Models of relaxation in glass
Rekhson, S. 131

Mechanical fatigue of silica glass
Tomozawa, M. and K. Hirao 149

Physical aspects in glass surface analysis
Mazzoldi, P. and A. Miotello 161

0022-3093/87/$03.50 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Fractal properties of gels
Zarzycki, J. 173

Section 2: Structure and Structure Determination

Neutron diffraction of as-quenched $Ge_{20}Te_{80}$ glass near the glass-undercooled liquid transition
Ichikawa, K., Y. Kameda, Qiang Xu and M. Misawa 185

Structure of alkali or alkaline earth metal gallate glasses
Fukumi, K. and S. Sakka 193

X-ray and neutron diffraction analyses of barium silicate glass
Hasegawa, H. and I. Yasui 201

Structure of $K_2O \cdot 4GeO_2$ glass based on X-ray diffraction analysis
Kamiya, K., T. Yoko, Y. Miki and S. Sakka 209

The study on the structure of ZrF_4–BaF_2–RF_3 (R = Al, La) glasses
Inoue, H. and I. Yasui 217

Ab initio molecular orbital study on the vibrational spectra of silicate glasses
Murakami, M. and S. Sakka 225

Molecular dynamics simulation of Li_4SiO_4 melt and glass
Iwamoto, N., N. Umesaki, M. Takahashi, M. Tatsumisago, T. Minami and Y. Matsui 233

Application of Mössbauer spectroscopy to the structural study of semiconducting vanadate glasses
Nishida, T., M. Ogata and Y. Takashima 241

Redox equilibria and coordination of Fe^{2+} and Fe^{3+} in silicate glasses from ^{57}Fe Mössbauer spectroscopy
Mysen, B.O. 247

Mössbauer study on the chemical state of iron in binary oxide glasses based on Fe_2O_3
Tanaka, K. and N. Soga 255

A structure analysis of (Ti,Zr)–X ternary alloy glasses by neutron scattering
Fukunaga, T., S. Shibuya, M. Misawa and K. Suzuki 263

Raman spectroscopic study on the glasses in the $M_2O(M'O)$–$Al_2O_3(Ga_2O_3)$–B_2O_3 system
Fukunaga, J. and R. Ota 271

Structure of zinc halide based glasses
Almeida, R.M. 279

Two phonon vibration spectra of amorphous As–Se–Sb and As–S–Sb systems
Onari, S., M. Kato and T. Arai 287

Raman spectra of Ge–S–Sb film
Zhong Boqiang 295

Defect structures in silica glass
Mulder, C.A.M. 303

EXAFS study of borate glasses containing copper
Lin Yunfei, Zhang Qi, Lu Kunquan and Zhao Yaqin 311

A unified scheme of interpretation of the X-ray absorption spectra used as structural probe
Benfatto, M. and C.R. Natoli 319

X-ray absorption spectroscopy in compressed vitreous silica and vanadium pentoxyde gel
Stizza, S., I. Davoli and M. Benfatto 327

Glass networks characteristic of borate, borosilicate and aluminosilicate systems
Osaka, A., Y. Miura and K. Takahashi 335

Formation mechanism of defect centers in GeO_2-doped silica glass
Hibino, Y. and H. Hanafusa 343

XPS studies of sulfide and selenide glasses
Nasu, H., R.M. Almeida, J. Heo, J.S. Sanghera and J.D. Mackenzie 351

Mössbauer studies of iron soda borate glasses
Pye, L.D., N. Belkhiria and A. Montenero 359

Electronic structures and gap states in amorphous chalcogenide semiconductors
Watanabe, Y., H. Kawazoe and M. Yamane 365

XPS studies of iron sodium borosilicate glasses
Agostinelli, E., D. Fiorani and E. Paparazzo 373

The nature of the chemical bond in oxide glasses
Kłonkowski, A.M. 381

Experimental evidence for the existence of intimate valance alternation pair defects in GeO_2 glasses
Dutta, B., D.L. Kinser, R.H. Magruder III and R.A. Weeks 389

New concept of glass structure – some experimental evidence of one-dimensionally preferred orientation model
Zhu Peinan and Wu Mianxue 397

Structure of Na_2O–TiO_2–SiO_2 glasses from the viewpoint of non-bridging oxygen measured by XPS
Yamanaka, H., K. Nakahata and R. Terai 405

Infrared and Raman spectra of vitreous silica and sodium silicates containing titanium
Kusabiraki, K. 411

EXAFS studies on the local structure of transition metal-based amorphous alloy: Structural rearrangement of amorphous $Cu_{60}Zr_{40}$ alloy during the crystallization process
Yamashita, H., H. Mizutani, T. Tanaka, T. Funabiki and S. Yoshida 419

Molecular orbital study for short and medium range order of P_2O_5 glass
Okura, T., N. Aoki and T. Kanazawa 427

RDF studies of Ge_xSe_{1-x} glasses employing anomalous scattering
Nukui, A., Y. Shimizugawa, H. Morikawa and K. Ohsumi 433

Section 3: Glass Formation and Phase Transformation

Applications of Zachariasen's rules to different types of non-crystalline solids
Mackenzie, J.D. 441

Nucleation kinetics in some silicate glass-forming melts
Hishinuma, A. and D.R. Uhlmann 449

Crystallization and phase separation in the system Li_2O–SiO_2
Braetsch, V. and G.H. Frischat 457

Glass-forming tendency in the $NaPO_3$–$MnCl_2$ system
Ota, R. and N. Soga 465

Glass formation in the system $ZnBr_2$–KBr–MBr_2
Kadono, K. and M. Nogami 473

Application of mass action law to glass forming oxide melts
Shultz, M. 479

Glass formation and crystallization in alkali-containing fluoride glasses
Zhao Xiujian and S. Sakka 487

The formation and properties of halide glasses in the system CdF_2–BaF_2–NaX (X = F, Cl, Br)
Zhang Keli, Xia Youlan, Huo Lingling and Yuan Qihua 495

Crystallization and structure of zinc-containing fluorozirconate glasses
Cheng Ji-Jian and Song Li 501

Stability of metastable $GeTe_2$ in thin films
Tsunetomo, K., T. Sugishima, T. Imura and Y. Osaka 509

Laser-induced and thermally annealed crystallization in chalcogenide glass $GeSe_2$
Inoue, K., K. Kawamoto and K. Murase 517

Thermal and laser-induced phase changes of Te–Se–M (M = In,Sn,Sb) thin films
Hou Lisong, Gu Donghong and Gan Fuxi 525

Crystallization properties of erasable optical disk using chalcogenide films
Jiang, F.S., J.C. Rhee, M. Okuda and T. Matsushita 533

Effect of some additives on crystallization and phase separation in glass systems Ge–Ga–S and Ge–As–S
Gan Fuxi and Zhang Mingli 539

Formation and optical properties of (R_2O or $R'O$)–TiO_2–Ga_2O_3 glasses
Kokubo, T., Y. Inaka and S. Sakka 547

Mass spectrometric study of evaporated Se films and melt-quenched Se glasses
Suzuki, K., K. Matsumoto, H. Hayata, N. Nakamura and N. Minari 555

Structure changes by annealing and doping of a-Si:H prepared at high deposition rate studied by means of positron annihilation
Nasu, H., M. Watanabe, K. Shizuma, S. Makida, M. Ueda, T. Imura, Y. Osaka and H. Hasai 563

Behavior of halide ions in borate glass
Wang Yuhu, A. Osaka, Y. Miura and K. Takahashi 571

Molecular dynamics studies of KCl–$ZnCl_2$ glasses
Hirao, K. and N. Soga 577

Molecular dynamics study of glass formation in the system ZrF_4–BaF_2–$BaCl_2$–MCl_2 (M = Mg,Ca,Sr)
Inoue, S. and D.R. MacFarlane 585

Structure and devitrification behaviour of sodium, lithium and barium borophosphate glasses
Marotta, A., A. Buri, F. Branda, P. Pernice and A. Aronne 593

Formation and optical absorption of Bi_2S_3 colloids in glasses
Lei Weiguo, Yin Baozhong and Huang Xihuai 601

Nature of doping into pure silica glass by plasma torch CVD
Arai, K., H. Namikawa, Y. Ishii, H. Imai, H. Hosono and Y. Abe 609

Author index Parts I and II xxi

Subject index Parts I and II xxxiii

PART II

Contents Parts I and II vii

Section 4: Optical Properties

Formation of extrinsic scatterers in ZrF_4-based fluoride optical fibers
Sakaguchi, S., K. Fujiura, Y. Ohishi, Y. Terunuma and T. Kanamori 617

Bubbles in heavy metal fluoride glasses
McNamara, P. and D.R. MacFarlane 625

Relationship between the intensity of the molar extinction coefficient of OH in fluoride glasses and glass matrix properties
Mitachi, S., G. Fonteneau and J. Lucas 633

Transmission loss of Ge–Se–Te and Ge–Se–Te–Tl glass fibers
Nishii, J., S. Morimoto, R. Yokota and T. Yamagishi 641

Structural defects in optical fiber glasses
Iino, A., J. Tamura and M. Ogai 647

Formation mechanism of drawing-induced defects in optical fibers
Hanafusa, H., Y. Hibino and F. Yamamoto 655

Hydrogen bond of OH-groups in silica glass and its relation to the 1.39 μm absorption
Yokomachi, Y., R. Tohmon, K. Nagasawa and Y. Ohki 663

Cause of the 5.0 eV absorption band in pure silica glass
Tohmon, R., Y. Yamasaka, K. Nagasawa, Y. Ohki and Y. Hama 671

Luminescence centers in SiO_2 and SiO_2:GeO_2 VAD rods sintered under reducing or oxidizing conditions
Kohketsu, M., K. Awazu, H. Kawazoe and M. Yamane 679

The effects of ion implantation on optical spectra of SiO_2 glass
Stark, J.D., R.A. Weeks, G. Whichard, D.L. Kinser and R.A. Zuhr 685

Pulse radiolysis studies on the oxide glasses
Maekawa, T., T. Yokokawa, S. Sawamura, M. Kitaichi and M. Katayama 693

Phosphate laser glass of absorption loss of 10^{-4} cm^{-1}
Toratani, H., H.E. Meissner, T. Izumitani and S.E. Stokowski 701

Optical absorption spectra of Ni^{2+} ions and IR spectra in $(100\text{-}x)(PbO \cdot GeO_2) \cdot x R_2O$ (R = Mg,Ca,Sr,Ba) glasses
Oyamada, R., A. Kishioka and K. Sumi 709

Photosensitivity and structural defects in dopant-free ultraviolet-sensitive calcium aluminate glasses
Hosono, H. and Y. Abe 717

Studies on the development process of gold ruby glasses
Yin Baozhong, Guo Changlin and Lu Changwei 725

Effect of furnace atmosphere on color of iron glaze
Wakamatsu, M., N. Takeuchi and S. Ishida 733

Light-induced optical changes in amorphous red phosphorus
Kawashima, K., H. Hosono, Y. Abe, S. Fujitsu and H. Yanagida 741

UV absorption shape between 3.5 eV and 5.6 eV in very thin a-As_2S_3 films at 80 K
Hoshi, H., Y. Suzuki and M. Hirai 749

Photo-induced absorption change in a-As_2S_3 films at 80 K
Eguchi, H., Y. Suzuki and M. Hirai 757

The influence factors of the temperature coefficient of T_D value in photochromic glass
Shen Juyun and Wu Aiying 765

Spectral properties of Ho^{3+} ions in noncrystalline fluorides
Gan Fuxi and Zheng Haixing 771

Evaluation and analysis of Ag photodoping in chalcogenide film by optical transmission measurement
Kawaguchi, T., S. Maruno and K. Masui 777

Optical properties in cadmium borogermanate glasses
Miura, Y., K. Saito, A. Osaka and K. Takahashi 785

Role of Sn^{2+} in development of red color during reheating of copper glass
Ishida, S., M. Hayashi, N. Takeuchi and M. Wakamatsu 793

Optical and thermal properties of chalcogenide Ge–As–Se–Te glasses for IR fibers
Inagawa, I., R. Iizuka, T. Yamagishi and R. Yokota 801

Section 5: Electrical and Magnetic Properties

Electrical properties of n-type semiconducting chalcogenide glasses in the system Pb–Ge–Se
Tohge, N., H. Matsuo and T. Minami 809

Effect of basic additive oxides on electrical conductivity of vanadate glasses
Hirashima, H. and T. Yoshida 817

Switching of TiO_2–V_2O_5–P_2O_5 glasses
Hirashima, H., Y. Watanabe and T. Yoshida 825

Preparation and properties of one-dimensional semiconducting hydrogenated amorphous silicon carbon alloys
Nitta, S., S. Nonomura, R. Takagi, A. Yasuda and N. Kojima 833

Influence of annealing on the physical properties and atomic structure of a-Si:H films
Wang, D., Y. Li, H. Wei, C. Tang, H. Yan and S. Huang 841

Study on amorphous ferrite CaO–Bi_2O_3–Fe_2O_3 system
Nakamura, S. and N. Ichinose 849

Ionic conductivity of rapidly quenched glasses with high concentration of lithium ions
Tatsumisago, M., K. Yoneda, N. Machida and T. Minami 857

Computer-controlled voltammetry – a tool for investigation of silicate melts
Wasberg, M. and K.H. Karlsson 865

A model interpretation of the correlation between the activation enthalpy and the breadth of electric modulus spectrum on varying the compositions in alkali aluminogermanate and other glasses
Ngai, K.L., J.N. Mundy, H. Jain, G. Balzer-Jollenbeck and O. Kanert 873

Ionic conductivity in doped fused silica
Varshneya, A.K., V. Jain and P.P. Bihuniak 881

The mixed alkali effect in lithium–sodium–aluminosilicate glasses
Lapp, J.C. and J. E. Shelby 889

Mixed alkali effect in glasses: A new model using the thermodynamics of irreversible processes
Mazzoldi, P. and A. Miotello 897

A defect model for the mixed alkali effect
LaCourse, W.C. 905

Electrical conductivity and chemical durability in alkali–silicate–oxynitride glasses
Unuma, H., K. Komori and S. Sakka 913

Chemical states of iron and electrical conduction in FeF_3–MnF_2–PbF_2 glasses
Kawamoto, Y., J. Fujiwara, K. Hirao and N. Soga 921

Electrical conductivity change with crystallization in fluorozirconate glasses
Hahn Taek-Sang, Cho Woon-Jo, Choi Sang-Sam and Park Soon-Ja 929

Effect of the mode formation on the structure of tellurite glasses
Dimitriev, Y., V. Dimitrov, E. Gatev, E. Kashchieva and H. Petkov 937

Anionic conduction in various fluoride glasses
Matusita, K., T. Komatsu and K. Aizawa 945

Fusion temperature effects on the annealing behaviour of $45V_2O_5 \cdot 55GeO_2$ glass
Khan, M.N., A. Al-Saie and A. Ahmed 953

Section 6: Relaxation and Mechanical Properties

Structural aspects of highly deformed glass melts
Brückner, R. 961

α-Relaxations in strong and fragile glass forming liquids
Ngai, K.L. 969

Chemical short range ordering in structural relaxation of amorphous Fe–Ni–Cr–P–B alloys
Arai, J., O. Haruyama and N. Asahi 977

Kinetics and mechanism of chemical short range ordering during structural relaxation in Co–Fe based metallic glasses
Komatsu, T., S. Sato and K. Matusita 985

Relations between elastic constants and flexural resonant frequencies of a beam
Kaneko, T. 993

Internal friction and electrical properties in phosphate glasses containing transition metal oxides
Tsuchiya, T., M. Otonari and T. Ariyama 1001

Some evidence of structural effects at the glass transition in electrolyte glasses
Carmona, P., A. Aouizerat-Elarby, J.F. Jal, J. Dupuy, J.A. Serughetti, J.M. Letoffe, P. Claudy, M.C. Bellissent-Funel and P. Chieux 1009

Origin of glass transitions in stabilized As_2Se_3–Se glasses
Motohashi, A. and A. Kinoshita 1017

A study of the dependence of high temperature viscosity on the composition of lanthanum series glasses
Liu Guizhi and Feng Zhenyu 1025

Viscosity of glassy Na_2O–B_2O_3–SiO_2 system
Shiraishi, Y., L. Gránásy, Y. Waseda and E. Matsubara 1031

The effect of composition on crack propagation in lead silicate glasses
Yoshimoto, M. and N. Soga 1039

Slow crack growth in phase-separated glasses
Miyata, N., S. Takeda and H. Jinno 1047

Section 7: Surfaces and Interfaces

Structure of porous glass prepared from fluorine-containing sodium borosilicate glasses
Takusagawa, N., K. Yamamoto and K. Kitajima 1055

Ultrasonic estimation of the solid–solid interface
Kaneko, T. 1063

Corrosion resistance of amorphous CoCrWZr alloys
Naka, M., M. Miyake and I. Okamoto 1071

Ion exchange in glasses: A systematic study using nuclear techniques
Battaglin, G., G. Della Mea, G. De Marchi, M. Guglielmi, P. Mazzoldi and A. Di Martino 1079

The structure and property of a new, biologically active glass-ceramics used as artificial bones
Liao Yunmao, Huang Zhangje and Chen Anyu 1087

Structure of an extremely thin film of a-SiO_2
Miura, K., M. Tada, H. Ohsaki, S. Kodera and T. Ino 1095

Anomalous surface transformations in silicate glasses and a-Si induced by high-power laser pulses
Kanemitsu, Y. and Y. Tanaka 1103

Interfacial analysis between zirconia containing glass and various alkaline media by X-ray photoelectron spectroscopy
Koshizaki, N., H. Takayanagi and K. Kemmochi 1111

Atomic-scale structure of CVD amorphous Si_3N_4–BN composite
Fukunaga, T., T. Goto, M. Misawa, T. Hirai and K. Suzuki 1119

Section 8: Sol–Gel Glass Process

Thermal evolution of glass forming gels
Montenero, A., F. Ugozzoli, D. Schiroli, D.C. Giori and L.D. Pye 1127

Structural investigation of SiO_2-aerogels
Fricke, J. and G. Reichenauer 1135

Structural studies of fractal silica aerogels
Dos Santos, D.I., M. A. Aegerter, A.F. Craievich, T. Lours and J. Zarzycki 1143

SAXS and BET studies of aging and densification of silica aerogels
Lours, T., J. Zarzycki, A. Craievich, D.I. Dos Santos and M.A. Aegerter 1151

Dielectric response of silica aerogels
Da Silva, A.A., D.I. Dos Santos and M.A. Aegerter 1159

Silica aerogel – a light-transmitting thermal superinsulator
Fricke, J., R. Caps, D. Büttner, U. Heinemann and E. Hümmer 1167

Acoustic dispersion in silica aerogels observed by Brillouin scattering: Evidence for phonon–fracton crossover
Courtens, E., J. Pelous, J. Phalippou, R. Vacher and T. Woignier 1175

Viscosity behavior of silicon alkoxide solutions in sol–gel transformation
Kozuka, H., H. Kuroki and S. Sakka 1181

Raman observation of fractons in silica-aerogels
Boukenter, A., B. Champagnon, J. Dumas, E. Duval, J.F. Quinson and J. Serughetti 1189

Elastic properties of silica aerogels
Woignier, T., J. Pelous, J. Phalippou, R. Vacher and E. Courtens 1197

Sol–gel processing of SiO_2: Structural implications from Cu(11) EPR
Darab, J.G. and R.K. MacCrone 1203

Author index Parts I and II 1211

Subject index Parts I and II 1223
